Impress patients & clients with this high-tech cognitive test. No paper. No pencils. No downloads. No Internet. No special or heavy equipment. No hassles. Automatically screens & scores cognitive ability. Use your own computer now.

Computerized Testing

This is the only computerized version of the Trail Making Test of the US Army Individual Test Battery. This Trail-Making Test contains two popular tests, Part A and Part B.

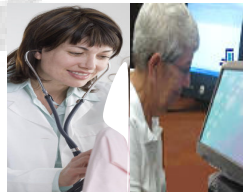

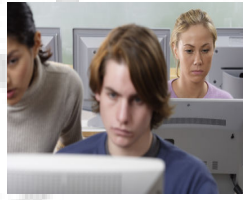

Automatic Trail Making Tests™ (ATMT) are designed to save agencies significant time, labor, and expense, and wait time because they rapidly screen and monitor individuals for cognitive decline, brain injury, cognitive impairment, or memory loss. Instant scores and feedback are provided through this unique software application that is ideal for office and field usage.

Use your existing computer now to offer rapid and powerful cognitive evaluations, fitness to drive determinations, fitness for duty measurements, and medical decision assessments with the Automatic Trail Making Test™ software. This product is also useful in remote locations and in areas that lack Internet connection access. (No Internet required!)

Streamline operations, automate cognitive testing processes, and improve the quality of healthcare now with Automatic Trail Making Test™ software.

Includes

- Trail Making Test, Part A
- Trail Making Test, Part B
