## **Computerized Testing**

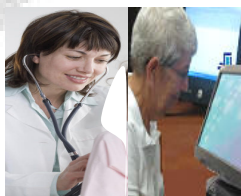

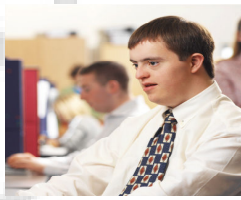

The Trail Making Test Part A, often called the Trails A Test, is one of the most popular cognitive tests.

The Automatic Trail Making Test Part A™ Software is the only autonomous and computerized Trail Making Test Part A of the US Army Individual Test Battery. It is designed to save agencies significant time, labor, expense, and wait time because it rapidly screens and monitors individuals for cognitive decline, brain injury, cognitive impairment, or memory loss. Instant scores and feedback are provided through this unique software application that is ideal for office and field applications.

Use your existing computer now to offer rapid and powerful cognitive evaluations, fitness to drive determinations, fitness for duty measurements, and medical decision assessments with the Automatic Trail Making Test Part A™ Software.

This cognitive test is ideal for all ages.

*Streamline operations, automate cognitive testing processes, and improve the quality of healthcare now with the Automatic Trail Making Test Part A™.*
