- Consists of a cognitive test recommended by the American Medical Association and NHTSA for older driver assessment
- Engages people who are unable to draw or write
- Ideal assistive technology for disabled veterans & special needs

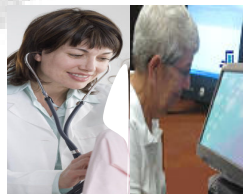

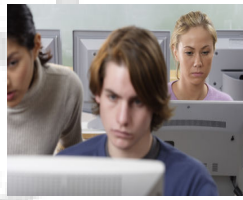

Computerized Testing

This is the only autonomous and computerized version of the Trail Making Test Part B of the US Army Individual Test Battery. It is designed to save agencies significant time, labor, and expense, and wait time because they rapidly screen and monitor individuals for cognitive decline, brain injury, cognitive impairment, or memory loss. Instant scores and feedback are provided through this unique application that enables rapid and effective cognitive evaluations in the office and field.

Use your computer now to offer powerful cognitive evaluations, fitness to drive determinations, fitness for duty evaluations, Traumatic Brain Injury assessments, and medical decision examinations with the Automatic Trail Making Test Part B™ Software. The American Medical Association recommends the Trail Making Test Part B as only one of two tests for older driver assessment of cognitive abilities.

This test is ideal for all ages.

Streamline operations, automate cognitive testing processes, and improve the quality of healthcare now with the Trail Making Test Part B Software™.
